

Orders & Account Help

Order changes, tracking, account access, and security

QUICK ANSWER

Manage active purchases from **My Account > Orders**. Guests can open the secure order-status link sent to the email address used at checkout.

1. View an order

- Signed-in customers can see status, item details, invoices, tracking, returns, and exchanges under **Orders**.
- Guest shoppers should select **View order** in the confirmation email and enter the order number plus billing postal code.
- A confirmation email may take up to 15 minutes. Check spam before contacting support.

2. Change or cancel

- An order can be canceled or edited for up to 30 minutes after placement, provided its status is still **Order received**.
- During that window, you may cancel an item or update the shipping address. Items cannot be added to an existing order.
- Once processing starts, address changes and cancellations are unavailable. Use the return process after delivery or ask the carrier about delivery options.

3. Account access

- Select **Forgot password** to receive a reset link. The link expires after 30 minutes and works once.
- If the email does not arrive, confirm the spelling and check spam. Five failed sign-in attempts lock the account for 15 minutes.
- Guest orders are not automatically displayed in a later-created account. Support can link an order after verifying the order email and billing postal code.

4. Privacy and support

- ShopSphere agents will never request a full password, one-time code, or complete payment-card number.
- To update your name, email, phone, or saved addresses, open **My Account > Profile**. A change does not alter orders already processing.
- For suspected account misuse, reset the password immediately and contact Help Center chat with the affected order number.

For faster help, share the order number and account email - never share a password or one-time code.
